### 'UROBOS: Project Times' is declared the peak of the international arts festival

## Huge success for 'Arbos' in Singapore

The first night of 'UROBOS: Project Time' from the music and theatre company 'Arbos', based in Klagenfurt and Salzburg was a huge success at the Singapore arts festival. Critics referred to the installation by the Austria company as the peak of the international festival.

'UROBOS: Project Time' is the third part of the trilogy 'Geschichten vom Reisen', from Dzevad Karahasan and Herbert Gantschacher. It combines the continental macrocosms, represented by microcosms of the time perspective in Asia, Australia, America and Europe.

Werbung

The acoustic visual project was recorded live from the festival and extracts will be burned on a CD. "The project has been on the television four times, eight programs on the radio and 96 news in the media," says the artist chief of 'Arbos', Herbert Gantschacher. 'UROBOS: Project Times' will be shown in Australia and New Zealand next year. 2003 will be on the turn of Austria, Germany, USA and Argentina.
